

REMEMBER WHITEPAPER

REMEMBER WHO YOU ARE Structure • Liquidity • Conviction

Deflationary System	Liquidity Focus	Community Conviction
Buybacks and burns are positioned as a core mechanism.	Liquidity is treated as a structural pillar for long-term growth.	The project is framed around strong holders and discipline.

INTRODUCTION

\$REMEMBER is not just a token. It is a system built on conviction, structure, and long-term execution.

In a market dominated by hype, short-term thinking, and liquidity extraction, \$REMEMBER represents a shift toward sustainability, discipline, and long-term value creation.

It was created to challenge the current model and build something that can survive, grow, and evolve.

This is not a trend.

This is a foundation.

MARKET REALITY

The current memecoin market is broken.

Thousands of tokens are launched, yet very few survive.

Most follow the same pattern:

Pump → Hype → Dump → Abandonment.

This cycle destroys trust, removes capital, and weakens the ecosystem.

Participants become exhausted. Confidence declines. And long-term value becomes rare.

This is the environment \$REMEMBER is built to outperform.

LIQUIDITY EXTRACTION

Most projects are designed to extract liquidity rather than create value.

They generate hype, attract buyers, and exit early.

Leaving others holding losses.

This system is unsustainable and damages the entire market.

\$REMEMBER is built to reverse this dynamic.

COMMUNITY FOUNDATION

\$REMEMBER is a coin of the community, for the community.

It is not controlled by a single entity.

It is built by individuals aligned by conviction, discipline, and long-term vision.

Its strength comes from unity. Only together can it reach its full potential.

DEFLATIONARY SYSTEM

Every transaction contributes to buybacks and burns.

Volume drives scarcity.

More activity → Less supply → Higher demand pressure.

This creates a system where long-term holders benefit by design.

Volume drives scarcity — More activity → Less supply → Higher demand pressure

LIQUIDITY STRATEGY

Liquidity is treated as a core pillar.

The goal is to strengthen it continuously and align it with market cap.

Strong liquidity reduces volatility, increases confidence, and enables sustainable growth.

LIQUIDITY INJECTION — MILESTONE ACHIEVED

\$REMEMBER has completed a strategic liquidity injection of **\$2,000,000** at a market cap of only **\$17,000**.

This represents an extraordinary liquidity-to-market-cap ratio, positioning \$REMEMBER far above industry standards for projects at this stage.

Liquidity Injected	Market Cap at Injection	Liquidity / MC Ratio
\$2,000,000	\$17,000	~117x

This injection was made by design — not by accident. It reflects the core conviction of the \$REMEMBER system: build the foundation first, then grow.

What this means for the ecosystem:

- Dramatically reduced price impact on buy and sell orders
- Greater resistance to manipulation and large sell-offs
- Increased confidence for new participants entering the market
- A structural advantage that compounds as market cap grows

This is not a promotional event. This is a structural commitment — proof that \$REMEMBER operates differently.

EVOLUTION OF FEES

As \$REMEMBER grows, the system evolves. Initially, fees focus on burns and scarcity. As market cap increases, fees begin to strengthen liquidity directly. This transition creates balance between growth and stability.

Phase 1	Phase 2	Phase 3	Phase 4
Liquidity	Stability	Growth	Maturity

Conceptual growth path

SUPPLY CONTROL

Supply defines market behavior. \$REMEMBER promotes strong holders and reduces weak hands.

This leads to:

- Lower volatility
- Greater control
- Stronger structure

Supply composition

- Burned supply supports scarcity
- Locked supply supports stability
- Circulating supply remains active

ANTI-DUMP SYSTEM

Through liquidity and supply control, the system becomes more resilient.

Large sell-offs have less impact. Stability increases over time.

STAKING

Future staking will allow tokens to be locked, reducing circulating supply and rewarding long-term conviction.

AIRDROPS

Airdrops will be strategic. Focused on real participants, not hype.

Designed to expand the ecosystem responsibly.

NETWORK EFFECT

More holders increase strength. More participation leads to stronger liquidity and demand.

The system improves as it grows.

TREASURY

Fees support growth, marketing, and expansion.

Execution is structured and intentional.

LISTINGS & MARKET PRESENCE

\$REMEMBER is already listed on key discovery platforms that improve visibility and support organic market presence.

Current listings include:

- FreshCoins
- CoinSniper
- CoinGem
- MoonK

These listings matter because discovery is part of growth. They increase exposure, strengthen legitimacy, and make it easier for new participants to find the project during each phase of expansion.

Visibility alone does not create value, but when combined with structure, liquidity, conviction, and community, it becomes a powerful multiplier.

Listings are not the foundation of the system. They are accelerators built on top of the foundation.

ROADMAP

1 Foundation	2 Expansion	3 Acceleration	4 Maturity
Supply control, strong holders, initial liquidity.	Listings, community growth, visibility increase.	Strategic marketing, volume growth, holder expansion.	Liquidity aligned with market cap, stability, self-sustaining system.

System evolution: Scarcity → Balance → Stability

Most will quit.

Most will sell.

Few will hold.

Few will win.

REMEMBER — WE BUILD TOGETHER
REMEMBER — WE GROW TOGETHER
REMEMBER — WE WIN TOGETHER

REMEMBER — WHO YOU ARE
